

Remainder-only Sturm value query: runtime and storage

Four adjacent AB/BA arms per rung, identical rational value-only inputs; no unrelated integer certificate in preparation. Kernel timings exclude preparation. Peak RSS includes preparation, child execution and native process baseline. All complete signed-result hashes agree. The paired ladder is descriptive evidence, not a complexity verdict. Source cd33400340, chungus2, leased CPU 85. All completed arms and failures retained; no load filtering or rerun.
