

Shipped real-algebraic scalar APIs vs FLINT qqbar and Z3 RCF

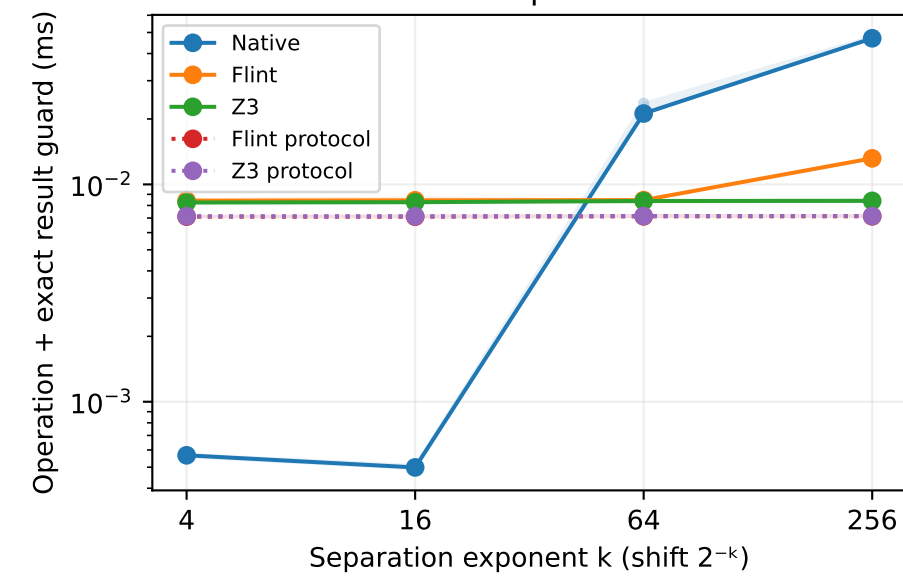

Add

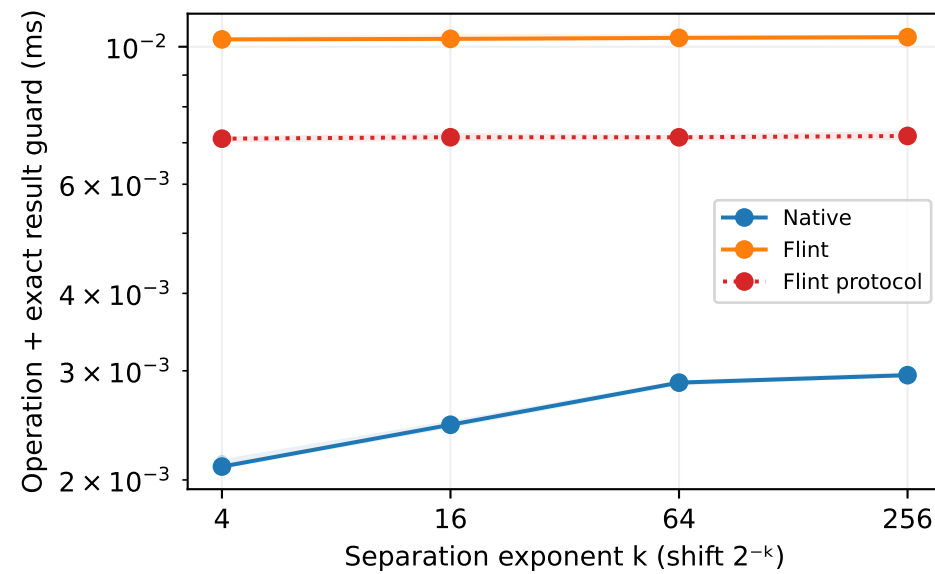

Sqrt

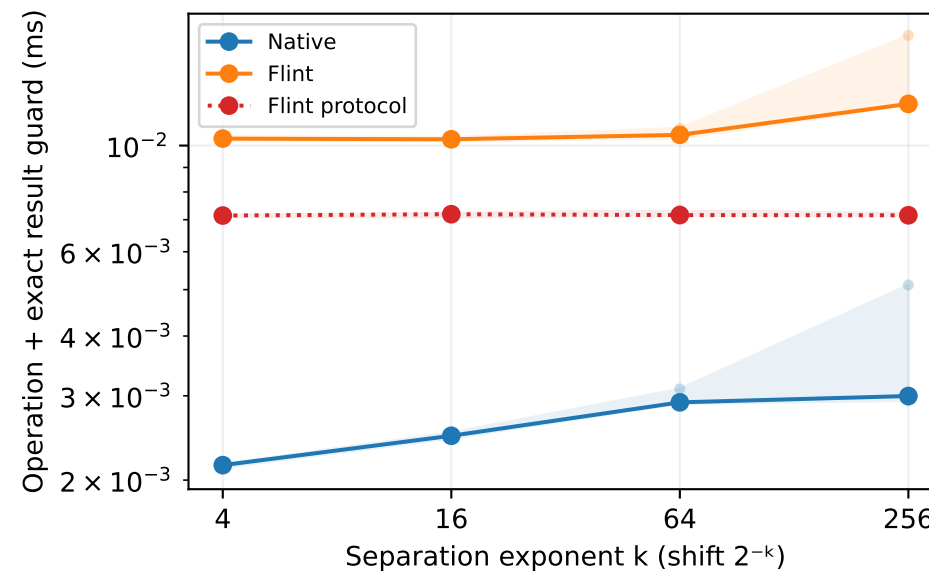

Compare

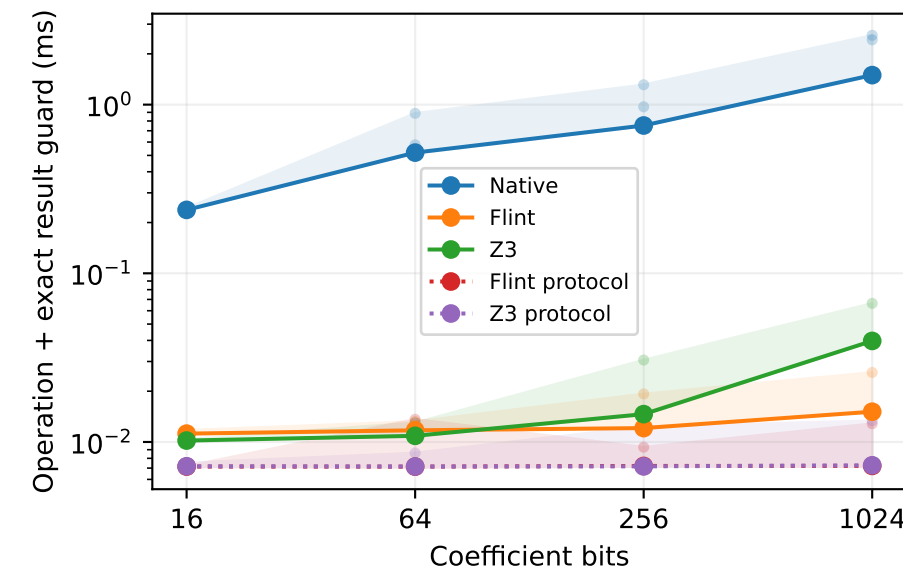

Floor

Ceil

Rational

Prepared operands; native arithmetic checks canonical polynomial/sign and external arithmetic checks exact annihilation/sign.
 Add/sqrt prepare no independent expected nonrational result; rational references and rounding integers are prepared.
 Native polynomial checks and external annihilation arithmetic differ. JSON/cleanup remain timed; no protocol subtraction.
 Missing Z3 floor/ceil arms denote an unavailable matching API. Whole-child caps include setup; see retained failures.
 Source a3ddc9473f, chungus2, leased CPU 45. All completed arms and failures retained; no load filtering or rerun.
